When I was eight years old, I fell while sliding down the banister and hit my mouth. The accident caused me to lose a front tooth and turn another one yellow. As a speech therapist, I am very conscious of my mouth and the yellow tooth bothered me a great deal. Over the years, I tried one thing after the other to correct the problem with no success until my dentist suggested Empress veneers. Now, Empress has given me the beautiful smile I always wanted.

Debby Colt
Speech Therapist/Teacher

There's an Esthetic RevolutionSM going on in dentistry!

These are exciting times for dentistry. Now your dentist can offer you the healthy, beautiful smile you have always dreamed of ... metal-free! No more dark fillings, dull lifeless crowns or black metal shadows at the gum line. Now, it is possible to repair broken or decayed teeth and actually "restore" them to their near, natural beauty and strength. In addition, these new restorative materials can change your smile by replacing stained, chipped, missing or worn teeth with metal-free inlays, crowns, veneers and bridges. Take a look at the examples in this brochure and then ask your dentist what procedure is right for you. Now, going to the dentist gives you something to smile about!

WELCOME TO THE ESTHETIC REVOLUTION! SM
