Dear Trident Laboratories:

I am writing this letter to commend you on your truly excellent work. I have only been with your lab for a few years and I know I can count on excellence, professionalism and consistency with every case I send you.

I have delivered three anterior units and three posterior units of Captek on one patient without any adjustment. Captek is the most esthetic PFM I have ever seen and my patient's expectations were exceeded beyond imagination.

I have also delivered six anterior units of Procera on two different patients and achieved excellent esthetic results. Procera even helped me restore a patient with Tetracycline staining that had nowhere else to turn.

The Valplast partial is an excellent esthetic alternative to fixed prosthesis. My patients are amazed at the lightweight flexible material and most importantly, no metal clasps. My patients are also impressed with the fact that they need very few adjustments, if at all. I have delivered countless Valplast partials and every case has turned out great. My patients still cannot believe the difference in comfort when compared to traditional cast metal partials.

Thank you to everyone who has worked with me. Every case comes out perfect and my patients always leave with a smile.

Sincerely,

A handwritten signature in blue ink that reads "David Mastrostefano". The signature is fluid and cursive, with the first name "David" being larger and more prominent than the last name.

David P. Mastrostefano, D.M.D.
