### NEW XRF (X-RAY FLUORESCENCE) TECHNOLOGY

Are Identalloy certification and material lot numbers enough to ensure safe materials are being used in the fabrication of your cases? Dentists are ensured what they prescribe is delivered to their patients by providing material certification reports from Trident's XRF (X-Ray Fluorescence) machine!

#### AT TRIDENT DENTAL LABS:

- XRF (X-Ray Fluorescence) Technology is used to test your patients' restorations for hazardous elements
- All FDA approved materials are tested
- Per your request, a Material Certification Report is provided with each case to ensure the restoration is as prescribed

For more information on Trident's new **Material Certification Program** or to schedule a case pick-up, call **(800) 221-4831** today!

Remember at Trident, you can always expect **quality**, depend on our **service**, and most importantly, **trust** that your case is safe to deliver.
